

Sustainability – making a positive difference to your business

Sustainability is one of the most important issues facing the world. As well as it being the right thing to do, research shows that consumers are willing to pay extra for products and services which come from companies that are committed to positive social and environmental impact.

Hunter Douglas is committed to support its business partners with sustainable solutions through products and processes that can help make your business profitable whilst contributing to a more sustainable world.

What is Cradle to Cradle?

The Cradle to Cradle Certified™ Products Program is becoming a globally recognized “gold standard” science-based quality certification. It acknowledges continuous improvement and innovation of products and processes towards the goal of being not just “less bad” but also “more good” for people and the planet. Hunter Douglas has committed itself to participate in this certification program.

 HunterDouglas

Cradle to Cradle

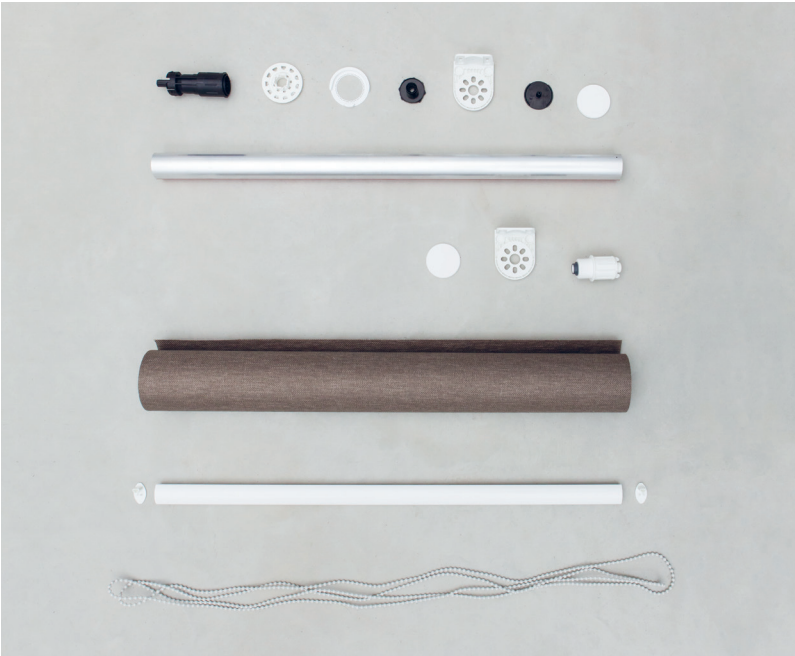

Hunter Douglas Cradle to Cradle Certified™ Product Program

Venetian Blinds – total finished product.
Manufactured with 98% recycled aluminum with all plastics and metal system components fully recyclable at the end of their product lifecycle.

Polyester FR and non-FR shading fabrics.
The widest range Cradle to Cradle™ certified fabrics in the market over 147 certified fabric qualities including GreenScreen Sea-Tex™, winner of the R+ T Innovations Award for “Technical Textiles” and the “Special Award for Energy Efficiency”. 50 % of the yarn in GreenScreen Sea-Tex™ is made from recycled ocean plastics.

Roller Blind EOS® 500 Xcel
Combined with Cradle to Cradle Certified™ fabrics, Hunter Douglas offers Cradle to Cradle Certified™ finished Roller Blind products with all hardware components recyclable at the end of their product lifecycle.

Cradle to Cradle Certified™ Hunter Douglas Product Scorecard

Material Health (Bronze)
The product is at least 75% assessed by weight.

Material Reutilization (Silver)
The product has a Material Reutilization Score that is ≥ 50 . The score consists of a combination of the recyclability and recycled content of the product.

Renewable Energy and Carbon Management (Bronze)
A renewable energy use and carbon management strategy is developed.

Water Stewardship (Bronze)
A facility-wide water audit is completed.

Social Fairness (Silver)
The company is actively conducting an innovative social project that positively impacts employee's lives, the local community, global.
